

## Session 1 (Sponsored by Roche)

# From Guidance to real -world application: How can we continue to better use RWD in HTA decision -making?

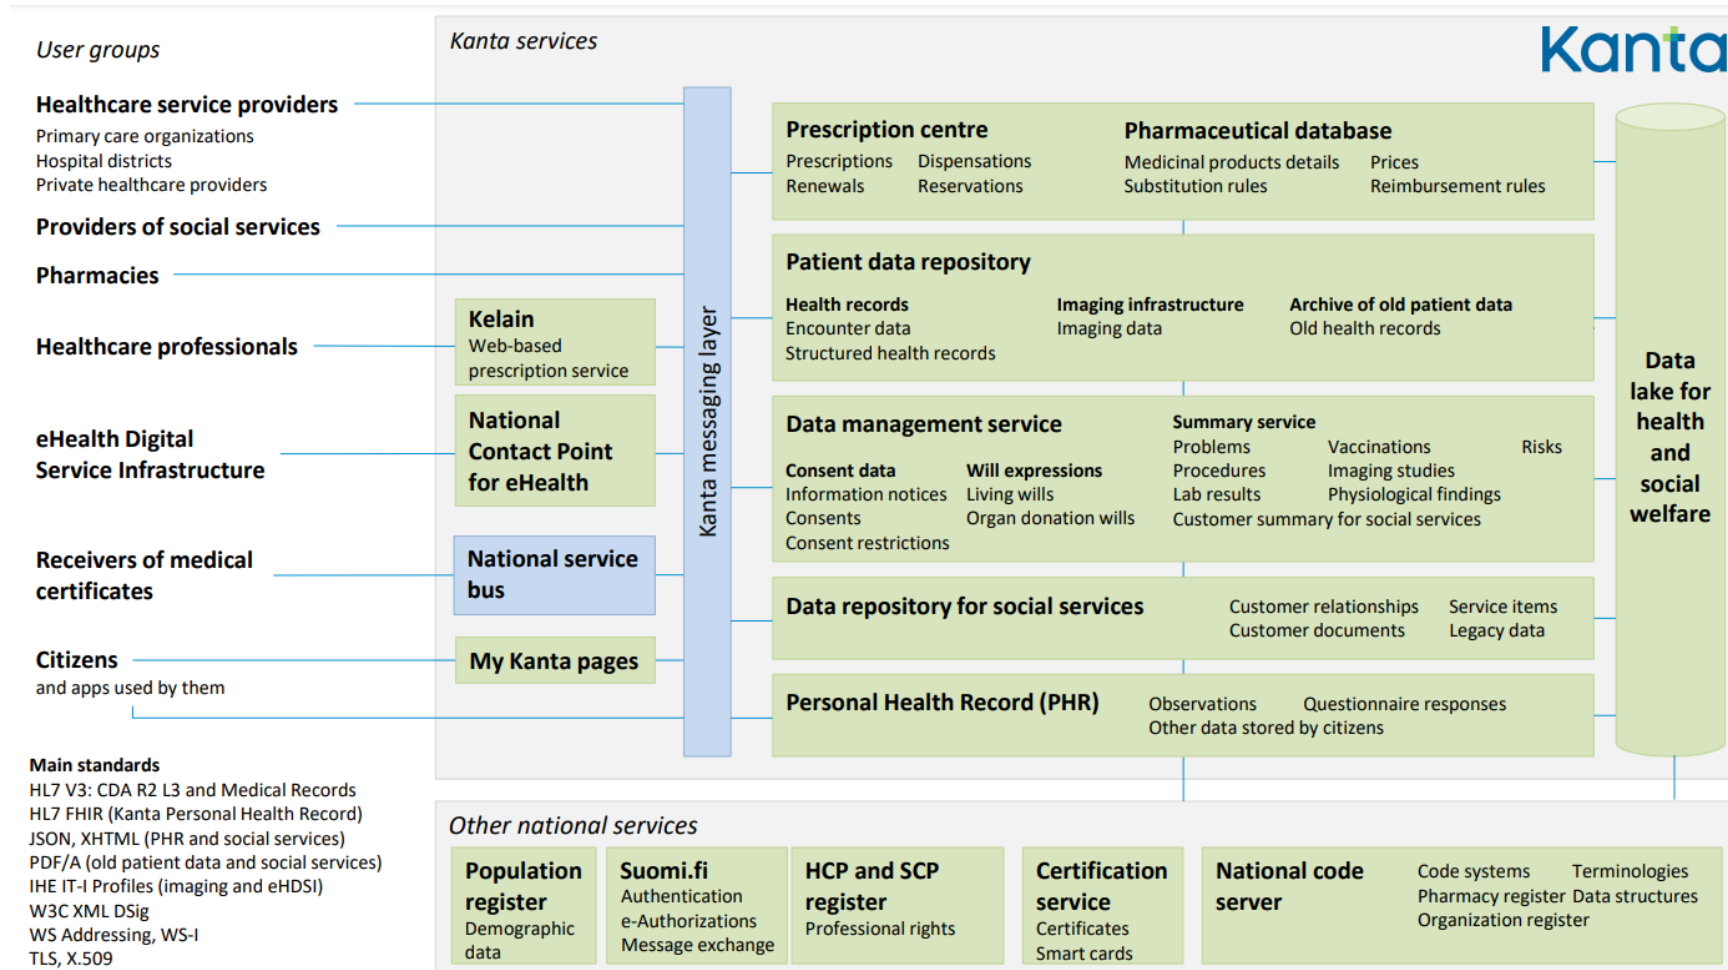

The Canadian Association for Population Therapeutics 2023 Conference  
Reimagining our Canadian Potential: Working Together through Partnerships and Collaborations  
October 23rd – 24th 2023, MaRS Discovery District

# Six policy areas of data enabled healthcare

- ***Infrastructure*** : Sectors and societies must invest in and protect the data infrastructure they rely on. Open data is the foundation of this emerging vital infrastructure.
- ***Capability*** : Everyone must have the opportunity to understand how data can be, and is being, used. We need data literacy for all, data science skills, and experience of using data to help solve problems.
- ***Innovation*** : Data must inspire and fuel innovation. It can enable businesses, startups, governments, individuals and communities to create products and services, fuelling economic growth and productivity.
- ***Equity***: Everyone must benefit fairly from data. Access to data and information promotes fair competition and informed markets, and empowers people as consumers, creators and citizens.
- ***Ethics***: People and organisations must use data ethically. The choices made about what data is collected and how it is used should not be unjust, discriminatory or deceptive.
- ***Engagement***: Everyone must be able to take part in making data work for us all. Organisations and communities should collaborate on how data is used and accessed to help solve their problems.
